

# BAT ACCESS ROOF TILES

BATS ARE A PROTECTED SPECIES IN THE UK AND PLAY A VITAL ROLE IN OUR ECOSYSTEM, HELPING TO CONTROL INSECT POPULATIONS AND SUPPORT BIODIVERSITY. AS TRADITIONAL ROOSTING SITES IN OLDER BUILDINGS DECLINE, PROVIDING SAFE ACCESS WITHIN ROOF STRUCTURES HAS BECOME INCREASINGLY IMPORTANT IN CONSERVATION AND DEVELOPMENT PROJECTS.

OUR CLAY BAT ACCESS ROOF TILES ARE DESIGNED TO PROVIDE DISCREET, SECURE ENTRY POINTS INTO ROOF VOIDS WHILE MAINTAINING THE CHARACTER AND PERFORMANCE OF THE ROOF. CAREFULLY MATCHED IN PROFILE, COLOUR AND TEXTURE, THEY INTEGRATE SEAMLESSLY WITH SURROUNDING TILES - IDEAL FOR HERITAGE, LISTED AND CONSERVATION-SENSITIVE PROPERTIES.

THE ENTRANCE DETAIL ALLOWS BATS TO ACCESS ROOSTING SPACES WITHOUT COMPROMISING WEATHER RESISTANCE, OFFERING A PRACTICAL SOLUTION FOR ECOLOGICAL MITIGATION REQUIREMENTS.

A SIMPLE, DURABLE AND AESTHETICALLY SYMPATHETIC WAY TO SUPPORT PROTECTED SPECIES WHILE PRESERVING ARCHITECTURAL INTEGRITY.

Description	Roof
Minimum Pitch	35°
Weight Per Set	3.4 kg
Bond	Staggered / Broken
Nail Size	38 x 3.35 mm
Tile Size	265 x 165 mm

*"The Devil is in the details"*
